Summary

I am an open-minded and goal-oriented front-end developer with experience in web application development.
I specialize in developing the front-end of app, visual effects of the app and cross-browser
and adaptive\responsive markup side of the application.

I love solving users problems and passionate about what I'm doing.
I have skills in graphic editors and design prototyping tools such as Adobe Photoshop and Adobe Experience Design.
I also have experience in creating a website design, from the prototype stage to the final and creating a style guide
And finally, I'm friendly and social ;)
